

CONTACTLESS INTEGRATED CIRCUIT(S) CARDS  
WG8 Webex call 13.11.2013, 14:00 METZ

**Minutes:**

1. Opening and Roll call of the experts

The wg8 secretary A. Lamm organized and opened the webex meeting.

The acting convener R. Meindl welcomed all participants:

Austria: F. Amtmann, G. Raimann, E. Reisenhofer

Germany: K. Aslanidis, M. Hegenbarth

France: S. Fidelis, JM. Gaultier, D. Orsatti, P. Roux

Japan: Y. Kaneko

Switzerland: J. Perez, D. Ruffieux

UK: G. Needham, C. Stanford

2. Adoption of the agenda

The agenda was adopted as presented

3. Review of available documents

Wg8n2162: WD of ISO/IEC 15693/Amd.3 VICC with extended memory

Wg8n2197: Japanese comments on n2162

Wg8n2198: Austrian comments on n2162

4. Reminder on ISO IP policy and request for patent declarations

No patents were declared

5. ISO/IEC 15693-3/Amd.3 VICC with extended memory

The group reviewed n2197 and n2198 which disclose a number of technical and editorial comments, however no substantial roadblocks have been raised. Most of the comments were postponed for a ballot resolution meeting after CD ballot.

German delegates expressed their dedicated concerns that backwards compatibility must be kept and will check the upcoming CD draft carefully in that respect.

The project editor was requested to accept and integrate the simple editorial comments FJ4, AT3/7/10/13 in a revised draft CD document, to be numbered wg8n2101.

The group accepted this revised document to be submitted for combined NP+CD ballot.

6. Closure of the webex meeting

The acting convener closed the webex meeting at 15:00.
