- In the 6N14151 section 9.2.2.2 Modulation on the ISO/IEC 18092, modulation index was proposed to change from “8 % to 30 %” to “8 % to 14 %.” The suggested change would break backward compatibility and therefore could not be accepted. Japanese delegation announced to submit a contribution on this issue for review at Croatia Ad hoc meeting.
 - Regarding the Singapore SG (6N14085) recommendation on adding the “PICC mode” and “VICC mode” as mandatory modes in 21481, Ad hoc group resolves to not include “VICC mode” in 21481 unless a convincing contribution is submitted to the Croatia Ad hoc meeting.
 - Ad hoc group resolves to not add further statement about interoperability to 21481 unless a convincing contribution is submitted to the Croatia Ad hoc meeting.
 - Ad hoc group reviewed and distribute the revised documents in 6N14xxx and 6N14yyy on ISO/IEC 18092 and ISO/IEC 21481 and discuss at Croatia ad-hoc, and also ask call for contributions on the improvement of the NFC
